

TSUNAMI SAFETY

QUICK REFERENCE

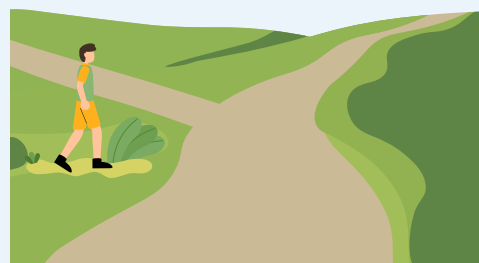

BEFORE

- Know the risk in your area.
- Make a plan and practice evacuation routes.
- Prepare your emergency go bag.
- Sign up for local alerts and warnings.

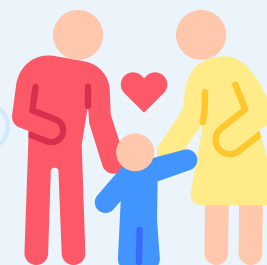

DURING

- Hear the alert or see a natural warning sign.
- Leave immediately. Don't wait.
- Move to high ground or inland.
- Follow official instructions.

AFTER

- Stay away from the coast until officials say it's safe.
- Check for hazards and avoid damaged areas.
- Help others if it's safe to do so.
- Stay informed and take care of your family.

IMPORTANT REMINDER

Tsunami waves may come in a series and continue for hours. One small wave does not mean the danger is over.
