

WARNING SIGNS

Recognize natural tsunami warning signs in nature, sound, and water.

NATURAL WARNING SIGNS TO WATCH FOR

OCEAN PULLS BACK

Water suddenly moves far away from the shore.

UNUSUAL WAVES

Large or fast-moving waves come in unusually or repeatedly.

LOUD NOISES

A loud roar from the ocean or rumbling sound.

STRONG EARTHQUAKE

A strong or long-lasting earthquake near the coast.

WHAT TO DO

REACT IMMEDIATELY

Don't wait for an official warning. Natural signs can mean danger.

MOVE TO HIGH GROUND

Go inland or to higher elevations as quickly and safely as possible.

STAY INFORMED

Listen to authorities and follow instructions. Stay away from the coast.

Recognize the signs. Act fast. Save lives.
